☒

Reply-To header

Name and address of the acting editor's account

To prevent spam detection, Nestor sends messages using its own server. However, you can configure the reply-to header here: the following value will be used when the recipient clicks "reply".

Once the template is created, it must also be linked to a specific [recommendation](#):

Submission Instructions

Sections

Topical Issues

Metadata

Flags

Questionnaires

Recommendations

Assignment Strategies

USERS MANAGEMENT

EDIT RECOMMENDATION - ACCEPTABLE AFTER MINOR REVISION

Recommendation label

Acceptable after minor revision

This label will be displayed:
- in the referees' and editors' report form
- when editors trigger the proposition or decision event

User event group

REVISION_REQUEST / PROPOSE_REVISION_REQUEST

You must select a group (accept/revise/reject).
The selected group will determine the mail templates available below.

Linked templates for profiles with right to decide (--> decision to author)

Major revision request
