

Advanced and saved searches

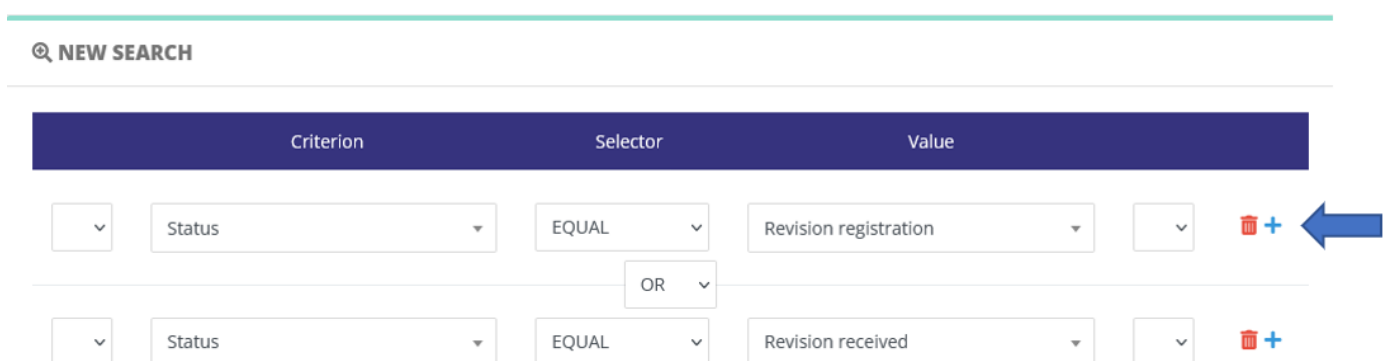

The advanced search is available through two buttons in your interface:

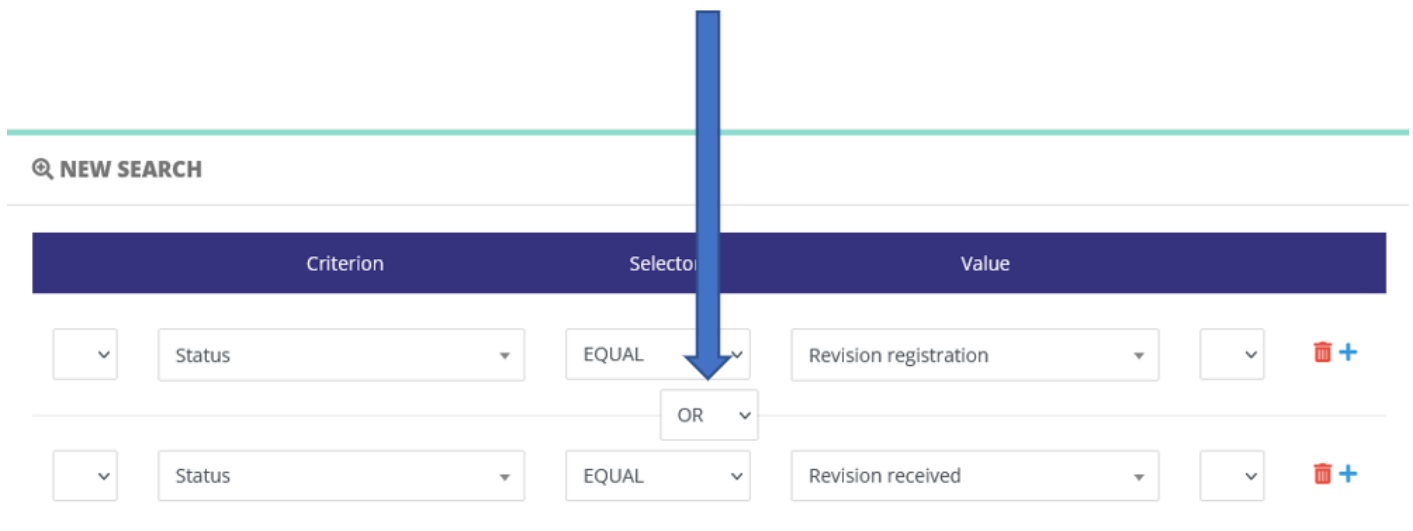

Criteria, operators and groups

The advanced search allows you to look for articles by combining several criteria with AND and OR operators.

To add a criteria, click on the (+) icon:

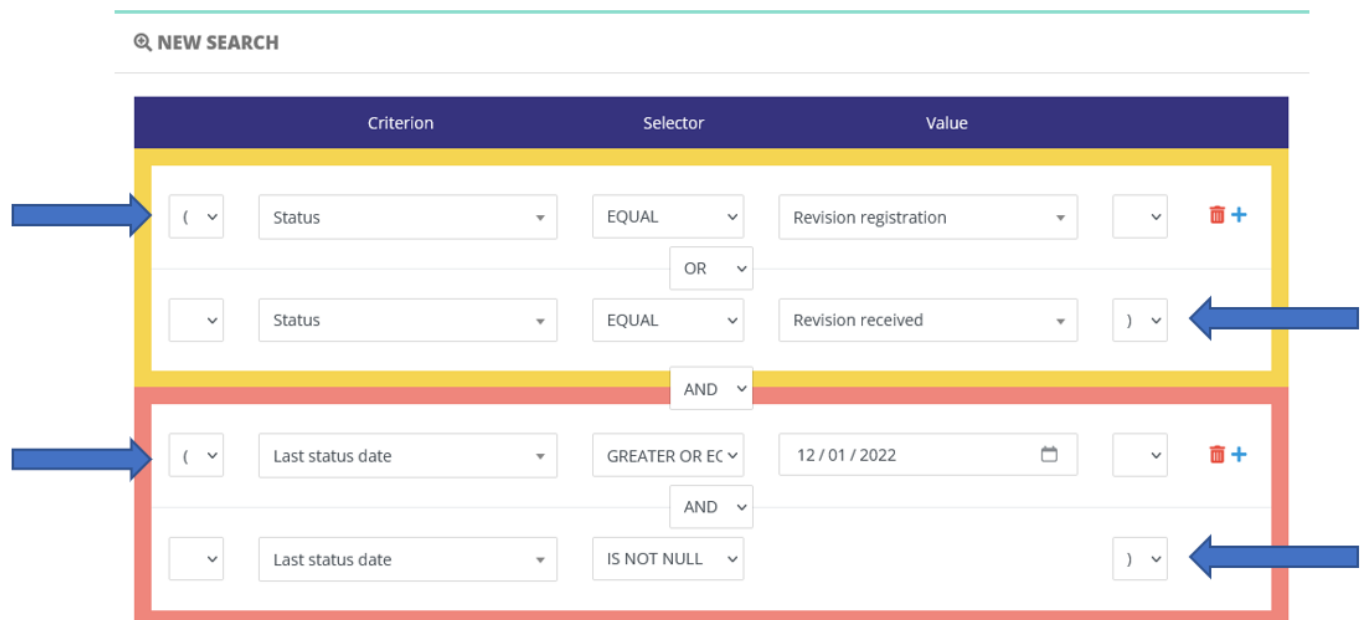

When several criteria are present, they must be combined with a boolean operator:

The screenshot shows a search interface with a header "NEW SEARCH". Below it is a table with three columns: "Criterion", "Selector", and "Value". The table contains two rows of criteria. The first row has "Status" as the criterion, "EQUAL" as the selector, and "Revision registration" as the value. The second row has "Status" as the criterion, "EQUAL" as the selector, and "Revision received" as the value. A blue arrow points to the "Selector" column, and a dropdown menu is open showing "OR" as the selected operator. Each row has a trash icon and a plus sign to its right.

Criteria can be grouped to refine your search. Groups are created using parentheses:

The screenshot shows a search interface with a header "NEW SEARCH". Below it is a table with three columns: "Criterion", "Selector", and "Value". The table contains two groups of criteria. The first group is enclosed in a yellow box and contains two rows: "Status" with "EQUAL" selector and "Revision registration" value, and "Status" with "EQUAL" selector and "Revision received" value. The second group is enclosed in a red box and contains two rows: "Last status date" with "GREATER OR EC" selector and "12 / 01 / 2022" value, and "Last status date" with "IS NOT NULL" selector. A blue arrow points to the opening parenthesis of the first group, and another blue arrow points to the closing parenthesis of the first group. A third blue arrow points to the opening parenthesis of the second group, and a fourth blue arrow points to the closing parenthesis of the second group. The groups are combined with an "AND" operator.

Advanced search: a case study

For example, let us search for papers:

- submitted by one specific author
- for two different special issues

The search request will look like this, where we specify:

- the author's login in the first line
- then search the topical issues by using a group:

NEW SEARCH

Criterion	Selector	Value
Corresponding author e-mail	CONTAINS	nicolas.boes
AND		
(Topical issue	EQUAL	AKARI
Topical issue	EQUAL	AMBER
OR		
)		

Saving search criteria

Once the search is launched and you visualize results, you can save the criteria:

NEW ADVANCED SEARCH

Show 25 entries Total: 40

Reference	Revision	Title	Status	Last Update	Due Date
AA-2005-3924	Rev. 2	Disk and wind interact...	Published	26/07/2005	
AA-2005-4134	Rev. 2	AMBER/VLTI and MIDI/VL...	Published	31/08/2005	
AA-2006-4799	Rev. 2	Interferometric data r...	Published	02/01/2006	
AA-2006-4848	Rev. 3	First direct detection...	Published	12/01/2006	
AA-2006-5408	Rev. 2	Direct constraint on t...	Published	11/04/2006	
AA-2006-5410	Rev. 4	An asymmetry detected ...	Published	11/04/2006	

To save the search, you must input a name, and can optionally display a shortcut in your dashboard:

Save search criteria

Search name

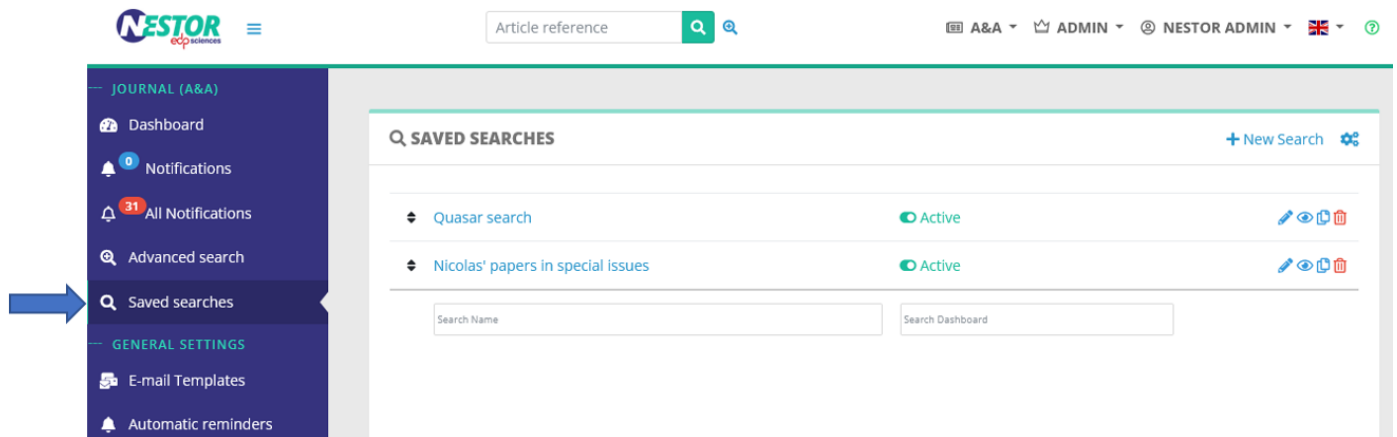

Nicolas' papers in special issues

Display on dashboard

Cancel

Save search criteria

You will retrieve your saved searches here:

and in your dashboard if you activated the option:

The screenshot shows the NESTOR dashboard interface. On the left is a dark blue sidebar with navigation options: JOURNAL (A&A), Dashboard, Notifications (0), All Notifications (31), Advanced search, Saved searches, GENERAL SETTINGS, E-mail Templates, Automatic reminders, Admin Settings, Production transfer, and Expertise fields. The main content area is divided into two sections: 'SAVED SEARCHES' and 'PERSONAL DASHBOARD'. The 'SAVED SEARCHES' section lists two searches: 'Quasar search' with 521 results and 'Nicolas' papers in special issues' with 37 results and 3 sub-items. A blue arrow points to the '3' sub-item count. The 'PERSONAL DASHBOARD' section has a 'To-do list' with three items: 'Registration' (12), 'Awaiting assignment' (6), and 'New submission' (4).

Editing/duplicating search criteria

Saved searches can be conveniently edited and duplicated when necessary, using those two buttons:

This close-up shows the 'SAVED SEARCHES' section. At the top right, there is a '+ New Search' button and a settings gear icon. Below, two search entries are listed: 'Quasar search' and 'Nicolas' papers in special issues'. Each entry has an 'Active' status indicator and a set of three icons: a pencil (edit), an eye (toggle visibility), and a trash can (delete). Below the list are two input fields: 'Search Name' and 'Search Dashboard'. Two blue arrows point upwards to the edit and duplicate icons of the second search entry.
