

The due date

AA-2022-45698 **AWAITING ASSIGNMENT**

Utilization of convolutional neural networks for Hi so

 Mr. Nicolas Boes  Registered authors

Editor due date:	11/02/2023
Submission date:	05/10/2022

The due date is indicated in the upper part of the article page. The due date indicates:

- who must take action to move the article forward?
- when is the action due?

According to the article status, it is used:

- as a deadline for the editor to take a decision on the article
- as a deadline for the author to revise, when a revision has been requested

How does Nestor uses the due date?

Nestor uses the due date for two important features:

- highlighting delayed articles in [dashboards](#) (with red counters)
- sending [automatic reminders](#)

How is the due date computed?

The due date is computed automatically when the article changes status, using:

today's date + a number of days

The number of days depends on the article type and its [workflow configuration](#). Some article types need faster processing times, so their due dates will be set earlier.

Can the due date be corrected?

Yes, the due date can be corrected!

- Automatically: the due date is corrected each time the article changes status
- Manually: the due date can be corrected just by clicking on it (if your profile allows it)
 - Correcting the due date will prompt you to send an e-mail to the concerned person
 - Typically, this happens when an author is granted a deadline extension to revise the paper.
