Upper area: the main information

The main information module is located in the upper area. It contains the most important information about the manuscript:

- The reference, status and flags
- The quick actions tool bar
- The article title
- The authors linked to the article, and tools to manage them
- The editors linked to the article, and related management tools (if you are Editor-in-Chief)
- Dates, most notably the due date, which is used to send automatic reminders and display belated and urgent articles in dashboards
