

4.10 - Co-author search, revert actions

31 January 2023

New documentation pages

We are happy to announce the opening of our new [documentation website](#).

Help links will now direct to this website, where all users may retrieve help articles and release notes.

Editorial board page improvements

This page is aimed at editorial offices and EICs, to get a quick overview of the current editorial board information:

- the list has been divided into active/inactive editors in the journal
- those two lists are sorted by profile for better readability
- they are exportable in csv/xls/pdf (just like articles list)
- they now display editor's expertise fields

EDITORIAL BOARD				
Active editors		Inactive editors		
First name	Last name	E-mail	Expertise fields	Actions
Editor-in-Chief				
Jean	Maison	j.maison@mailinator.com	Superglass optics Optic bis individual	
Paul	Sapin	paul.sapin@test.fr	Energy storage Superglass optics Low carbon transportation	
Topical Editor				
Fred	TE-botany	f.crary@univ.org	Energy storage Glass optics Low carbon transportation	
Fifi	TE-palaeon	f.tour@test.sp		

Quick search filter on expertise fields

The expertise field filter has been improved. Instead of searching with full text, the filter now proposes the journal's active expertise field. This filter can be applied to the following tables:

- articles datatables
- board datatables
- referees searches
- user searches

Section editor			
John	Cusack	john.cusack@test.fr	
Uri	Daz	uri.daz@test.gr	
Editorial assistant			
Anny	Poumo	a.pou@test.fr	

- Search Expertise fields
- Bioenergies
- Energy efficiency and smart grids
- Energy storage
- Hydrogen and e-fuels
- Low carbon transportation
- Optics
- Optics Bis

Co-author search tool

During the submission process, the corresponding author may now use a new tool, allowing him to:

- search colleagues in the journal user database
- easily add them to the co-authors list

Co-authors added with this method will undergo the same validation workflow as co-authors added

Add a co-author ⊗

i This form will search your previous co-authors.
The selected author will be added to the authors list of your manuscript

Search a co-author ▾

Cancel Add this co-author

Add a co-author ⊗

Revert actions have been merged

Reopen / revert / send back: these 3 similar actions have been merged into a single action, allowing an editor to:

- rewind and correct the article history
- warn the author if necessary

This is especially useful to cancel editorial decisions and handle appeals. Hopefully, having a single action will clarify your interface. The "revert" action is straightforward, it will:

- erase the last status on an article
- null any final decision data

"Revert" is available according to your profile's rights and the article status.

For example:

- you may revert a revision request if you have the right to request revisions
- but you cannot revert a revision if you cannot request revisions.

Editorial decision

 Dr. Nestor Admin

Editorial decision  Minor Revision - 02/01/2...

The author is currently revising the manuscript.
You will be notified as soon as we receive it.

 Revert decision
