

# 5.20 - arXiv identifier, friendlier editing behaviours on the article page

6 December 2023

## Adding the arXiv identifier

Authors may now submit their [arXiv](#) identifier when submitting their article.

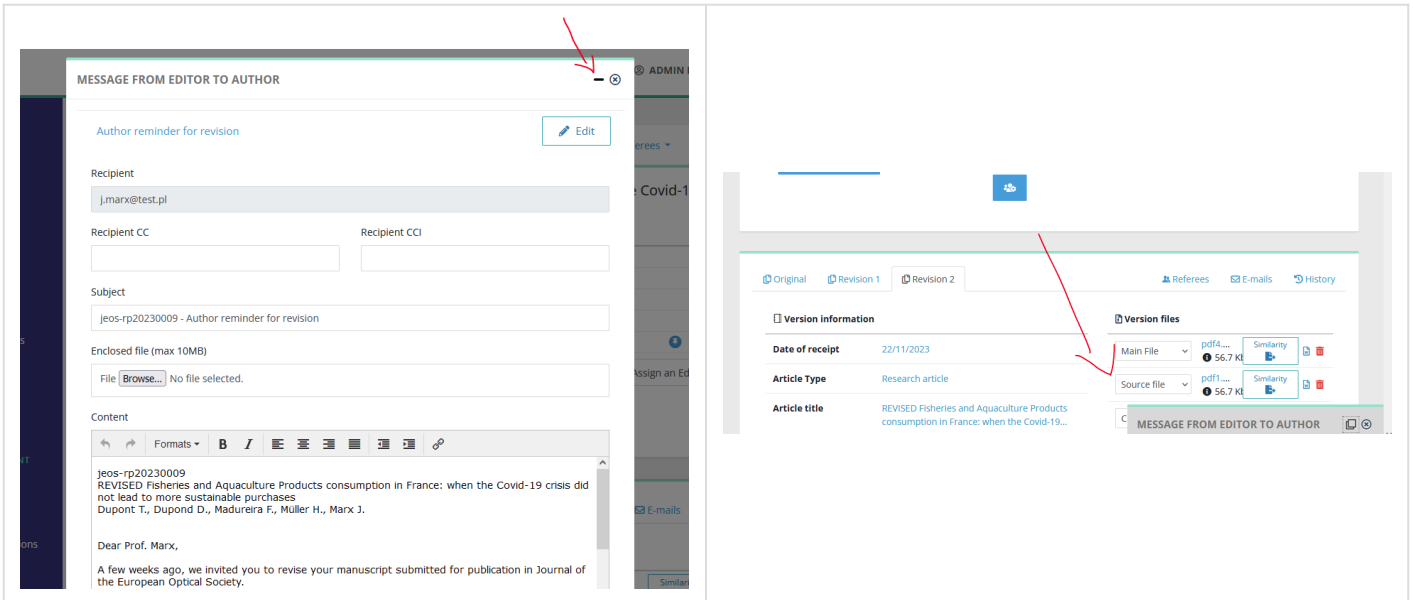

The screenshot shows a web interface titled "EDIT YOUR ARTICLE:". At the top, there is a horizontal navigation bar with seven steps: "1. Article ty...", "2. Files", "3. Data", "4. Authors", "5. People", "6. ArXiv & Funding", and "7. Validation". Step 6 is highlighted in green. Below the navigation bar is a main content area with a white background and a light gray border. It contains the following text: "By providing the arXiv ID, you will allow arXiv to add a link from the arXiv e-Print to the A&A published version of your article." followed by "After you press the 'Check' button, the arXiv data will be displayed. You must then press the 'Confirm' button to confirm the arXiv ID." To the right of this text is the arXiv logo. Below the text is a horizontal line, and under it, the label "ArXiv ID" is followed by a green button with a plus sign and the text "+ Add arXiv ID".

To unlock this form, activate it in the [article type configuration](#).

If the author provides the arXiv identifier, this allows us to notify arXiv once the article is published, arXiv updates the preprint page with the publication information:

# Hiding referee reports and the editorial decision

The author profile configuration now provides an option to mask the decision module to the author.

Revision #6
