

# 5.30 - Article lists: update on viewable / exportable columns

11 January 2024

## Article lists: the referee column

By default, articles lists now display a column dedicated to active referees:

**NESTOR** eDP sciences

LIST OF ARTICLES: PEER REVIEW IN PROGRESS

Export Columns

Reference	Title	Referee(s)
ab123123	A catalogue of solar-like kaijus observed by WOW in 120-second cadence	Boes
ab123124	Accelerations of stars in the central Park from NJ3	Desogus
ab123125	A comparative analysis of the type II nebulae 2018yy and 2019hjhx	Jamet
ab123126	Acoustic response in the transition region to transverse kaijus	Piobro
ab123127	A first glimpse at the nuclear stellar disc line-of-sight structure	Brasso
ab123128	A giant pizza-like stellar nebula around galaxy NGC 22222	Maduro

Answer pending

The column is designed to provide relevant information (status and reminders) on referees currently working on the paper, thus helping editors to quickly scan urgent manuscripts.

If your editors contact several referees on each article, they may want to disable this option in the column configuration:

The screenshot shows the NESTOR EDP Sciences interface. At the top left is the NESTOR logo. The main content area is titled 'LIST OF ARTICLES: PEER REVIEW IN PROGRESS'. Below the title is a table with two columns: 'Reference' and 'Title'. The table contains six rows of article information. To the right of the table, a 'Columns' dropdown menu is open, displaying a list of columns. The 'Referee(s)' column is highlighted in grey. Two blue arrows point to the 'Columns' dropdown and the 'Referee(s)' option.

Reference		Title
ab123123	➔	A catalogue of solar-like kaij by WOW in 120-second cade
ab123124	➔	Accelerations of stars in the from NJ3
ab123125	➔	A comparative analysis of th nebulae 2018yy and 2019hj
ab123126	➔	Acoustic response in the tra to transverse kaijus
ab123127	➔	A first glimpse at the nuclea line-of-sight structure
ab123128	➔	A giant pizza-like stellar neb galaxy NGC 22222

## Article lists: status date / last action date columns

The former 'last update' column has been replaced by two different columns:

- The 'status date' is simply the date of arrival in the article status,
- The 'last action date' reflects the date of the last action taken on the paper, whether an action by the author, referee or editor.

## LIST OF ARTICLES: AWAITING ASSIGNMENT

[Export -](#)[Columns -](#)

Reference	Title	Status	Status date	Last action date
AA0037-23	Measuring local physical parameters in coronal loops with spatial seismology	Awaiting assignment	29/11/2023	29/11/2023
AA0027-23	Test paper	Awaiting assignment	01/12/2023	01/12/2023
AA0044E-23	The properties of 0.11 keV to 344 MeV ion spectra in the inner heliosheath using regularized k-distributions	Awaiting assignment	27/11/2023	27/11/2023
AA0045E-23	The star formation history of low-mass disk galaxy: A case study of NGC 300	Awaiting assignment	28/11/2023	28/11/2023
AA0023-23	Test paper 2	Awaiting assignment	01/12/2023	01/12/2023

# Complete mail history on the article page

The complete mail history is now available as soon as the article is loaded.
