5.40 - Improvements of the production and referee workflows

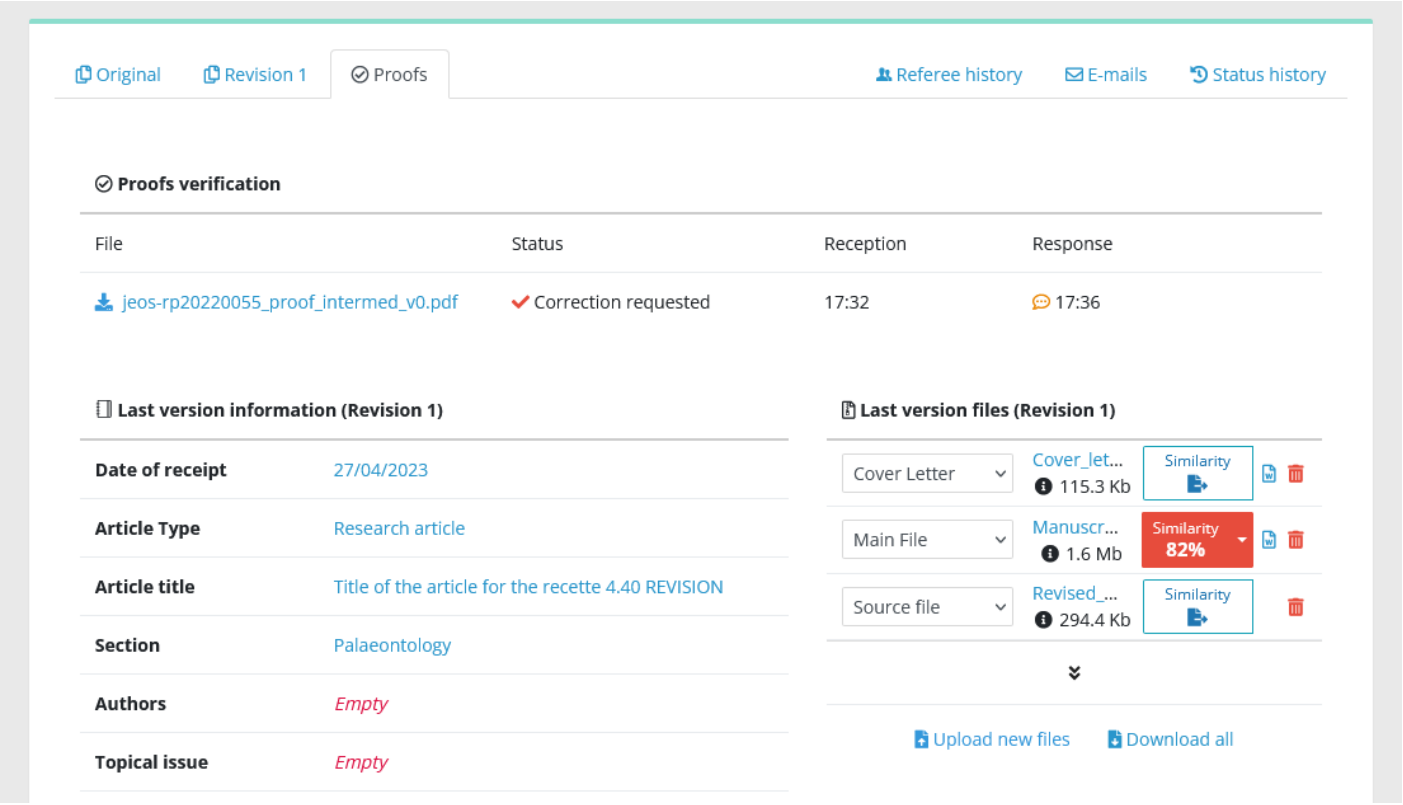

29 January 2024

Improvements of the production workflow

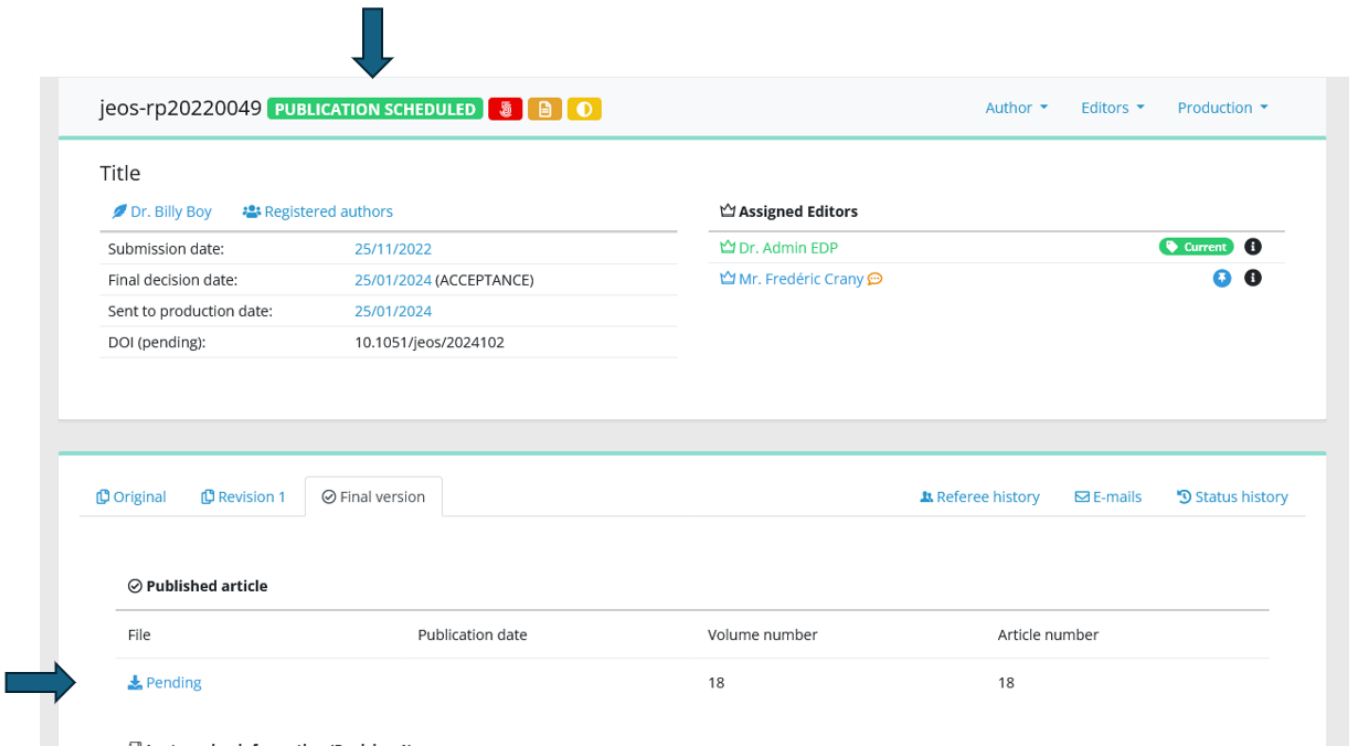

Actions related to production are now conveniently gathered in a dedicated thumbnail:

Article files of the last version remain available even when the article is in production:

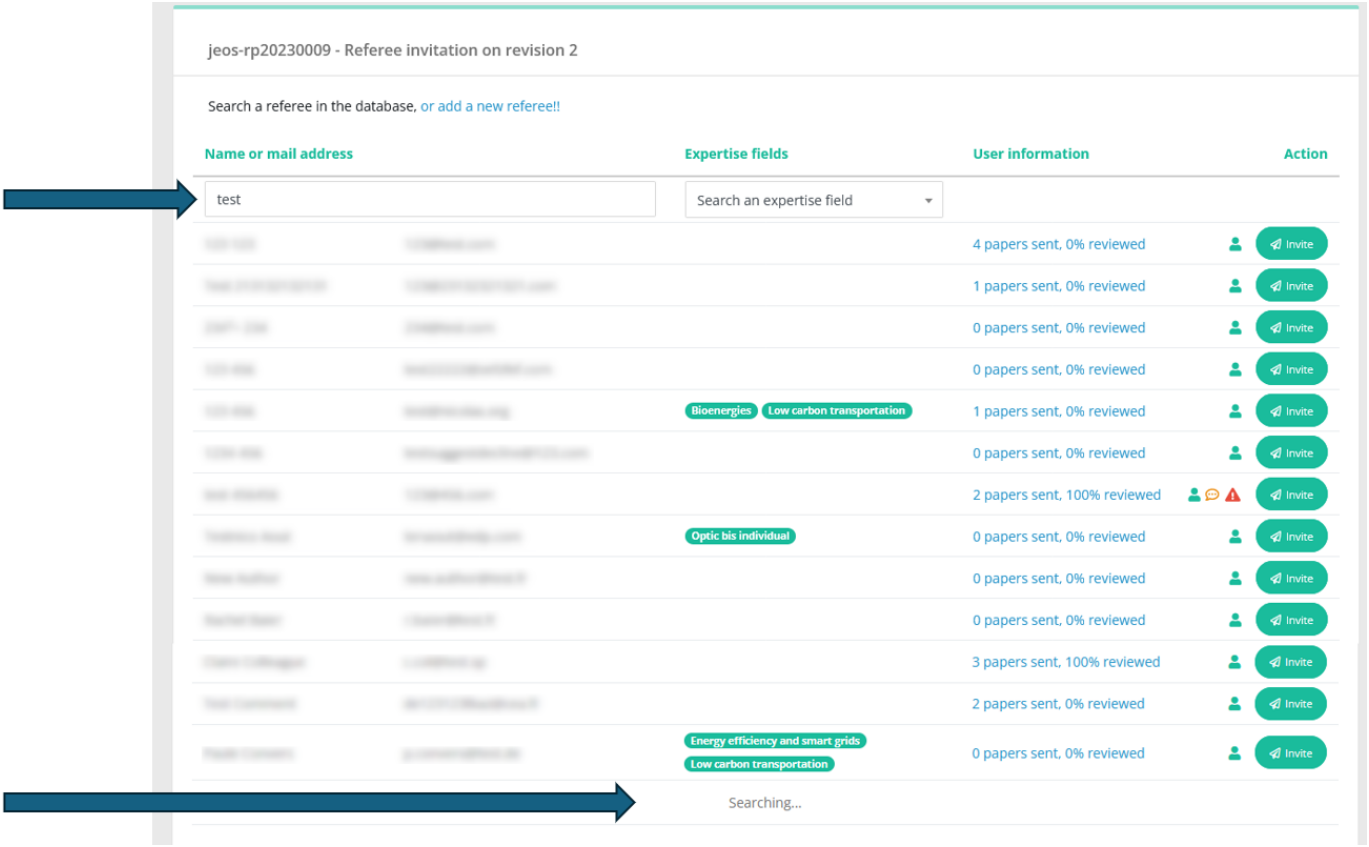

A new status appear: publication scheduled. This status allows authors and editors to be informed of the publication a bit sooner.

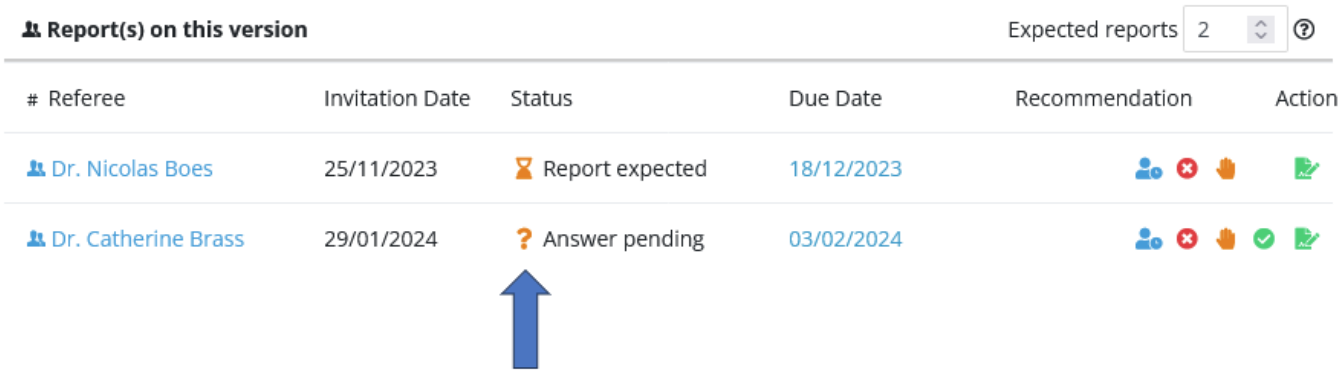

Improvements on the referee workflow

The search field has been simplified, and the number of results is no longer limited:

The referee status icons now distinguish clearly pending invitations from expected reports;

Revision #3
