Improvements on the referee workflow

The search field has been simplified, and the number of results is no longer limited:

The screenshot shows a search interface for referees. At the top, it says "jeos-rp20230009 - Referee invitation on revision 2". Below that is a search bar with the text "Search a referee in the database, or add a new referee!". The search results are displayed in a table with columns: "Name or mail address", "Expertise fields", "User information", and "Action". A search bar contains the text "test". The results list includes names, email addresses, expertise fields (e.g., "Bioenergies", "Low carbon transportation", "Optic bis individual", "Energy efficiency and smart grids", "Low carbon transportation"), and user information (e.g., "4 papers sent, 0% reviewed"). Each row has an "Invite" button. A blue arrow points to the search bar, and another blue arrow points to the "Searching..." text at the bottom of the results list.

The referee status icons now distinguish clearly pending invitations from expected reports;
