

5.60 - Referees reinvitations, submission files extension locks

15 May 2024

Referee reinvitations

When the editor receives a revision, it is now easier to check the referee activity on previous versions

bc2400654 **REVISION RECEIVED** ⓘ Author ▾ Referees ▾ Editors ▾

Invited referees Expected reports 1 ⌵ ⓘ

# Referee	Invitation Date	Status	Due Date	Recommendation	Action
<i>No invited referee</i>					
Report(s) on previous version(s)					
Dr. Nicolas Boes		Previous report(s) Rev. 2: Acceptable after minor revision			Reinvite

Q

and to reinvite the referee easily:

bc2400654 **REVISION RECEIVED**  Author ▾ Referees ▾ Editors ▾

Invited referees Expected reports 1 

# Referee	Invitation Date	Status	Due Date	Recommendation	Action
<i>No invited referee</i>					

Report(s) on previous version(s)

 Dr. Nicolas Boes	 Previous report(s) Rev. 2: Acceptable after minor revision	 Reinvite 
--	---	--

Submission files: media type locking (file extensions)

The configuration of file types has been improved: each custom file type for your journal may now be restricted to specific media types.

For example, let us consider that your journal requests a cover letter at submission.

Thanks to this update, this cover letter may now be restricted to PDF or DOC formats: this is up to you!

EDIT FILE TYPE - COVER LETTER FOR THE EDITOR

GENERAL SETTINGS

Name *

Cover letter for the Editor

SUBMISSION SETTINGS

Unique file
If the file is set-up as "unique", users can only upload one file of this type per revision. This is useful for file types such as copyright files, pre-published manuscripts etc.

Deleted on revision
To prevent duplicate figures, bibliography etc, when the author submits a revision, Nestor can reuse the files submitted previously by the author. However, some files need to be deleted automatically, to force the author to update. Deleting the file automatically is useful for types such as replies to referees, revised manuscripts etc.

File extensions locking

Allow all extensions

Allow only extensions specified here

NB Nestor also checks the file content to ensure it matches the extension media type.

x doc
x docx
x pdf

In the submission tunnel, this will translate like so:

MANDATORY FILES

E-mail templates: improvements on variables

Variables related to [editors responsibility](#) have been added: the editor in charge and technical editor may now be called in mail templates.

Editor in charge variables

Editor in charge title

Editor in charge first name

Editor in charge last name

Editor in charge full name

Editor in charge e-mail address

Editor in charge profile

Editor due date ⓘ

Calculated editor due date ⓘ

Technical editor variables

Technical editor title

Technical editor first name

Technical editor last name

Technical editor full name

Technical editor e-mail address

Technical editor profile

Editor due date ⓘ

Calculated editor due date ⓘ

Furthermore, date variables now provide a very convenient tool to set up date formats:

Technical editor variables

Technical editor title

Technical editor first name

Technical editor last name

Technical editor full name

Technical editor e-mail address

Technical editor profile

Editor due date ⓘ

Calculated editor due date ⓘ

Logged user

Help to format date

Default : 16/05/2024

'm/d/Y' : 05/16/2024

'F j, Y' : May 16, 2024

'F js' : May 16th

'l, F js' : Thursday, May 16th

'D, M js' : Thu, May 16th

Production interface for authors

The production interface has been slightly improved for authors: removing duplicate buttons, and setting up proper warnings.
