

6.00 - Refreshed articles, sorting expertise fields, referee exports

2 October 2024

Journal-related features

Refreshed articles

In Nestor lists, delayed articles are tagged in red:

Reference	Revision	Last action date	Due Date
JEOS-RP20240035	Rev. 3	12/08/2024	27/08/2024
JEOS-RP20240050	Rev. 3	30/09/2024	15/10/2024
JEOS-RP20230076-ERR	Original	14/02/2024	29/02/2024
JEOS-RP20240028	Rev. 1	04/06/2024	19/06/2024
JEOS-RP20240018GISS	Rev. 1	31/05/2024	30/03/2024
JEOS-RP20240048	Original	04/09/2024	07/09/2024
JEOS-RP20230086-ERR	Original	22/07/2024	28/07/2024

This color is solely based on the article due date, whether it has passed or not.

In some journals, this proved confusing for editors, who expects the color 'red' to reflect if an editorial action is needed or not. In particular, they expect the paper to revert to a normal color when they execute an action (based on last action date):

Show 25 entries

Total: 7

Reference		Revision	Last action date	Due Date
JEOS-RP20240035	   	Rev. 3	17:41	27/08/2024
JEOS-RP20240050	 	Rev. 3	30/09/2024	15/10/2024
JEOS-RP20230076-ERR	 	Original	14/02/2024	29/02/2024
JEOS-RP20240028	 	Rev. 1	04/06/2024	19/06/2024
JEOS-RP20240018GISS		Rev. 1	31/05/2024	30/03/2024
JEOS-RP20240048	  	Original	04/09/2024	07/09/2024
JEOS-RP20230086-ERR	   	Original	22/07/2024	28/07/2024

This new behaviour is configurable by article type. When activated, this option will temporarily 'refresh' the paper where an editorial action has just been taken.

Sorting expertise fields

At long last, expertise fields can be sorted in the configuration pages. The order will be reflected in user pages (account creation and consultation) and article pages (submission and edition).

EXPERTISE_FIELDS

Name	Activated
↕ Bioenergies	🟢 Active
↕ Energy efficiency and smart grids	🟢 Active
↕ Energy storage	🟢 Active
↕ Hydrogen and e-fuels	🟢 Active
↕ Low carbon transportation	🟢 Active
↕ Optics	🟢 Active
↕ Glass optics	🟢 Active
↕ Superglass optics	🟢 Active

Referee exports

List of referees can now be exported, based on specific search results. For example, one can look at all reports submitted in 2024. The data is complete but still in raw format, we are working on providing an Excel template to get usable statistics.

Article-related features

Terminate or close the article before technical check!

We have disabled this workflow security. Beforehand, a paper could not be rejected directly when registration was pending. This simple feature is available to editorial offices straight out of the box.

Fix the editors' list at any given time

Yet another workflow simplification. This simple feature is available to all EIC/EO, no configuration is needed.

Reset referee reports (be careful!)

Referee reports can now be deleted altogether. This should be used carefully, to correct specific referee cases/mistakes. The action can only be executed when the following conditions are met:

- a report can be reset only on a current version
- the article is being evaluated (status)

jeos-rp20240027 **WAITING EDITORIAL DECISION** Author Referees Editors

Reset referee: caution

The existing report by **Nicole Boes** will be deleted.
This will reopen the current version to **Nicole Boes**, to upload a new report.

# Referee	Invitation Date	Status	Due Date	Recommendation	Action
2 Dr. Nicole Boes	14/08/2024	✓ Report received	Acceptance - 03/10/2024
