

6.50 - new user exports, referee invitation, stop production

14 May 2025

Authors and editors exports

Following the [referees' activity](#) last year, we release two new data exports:

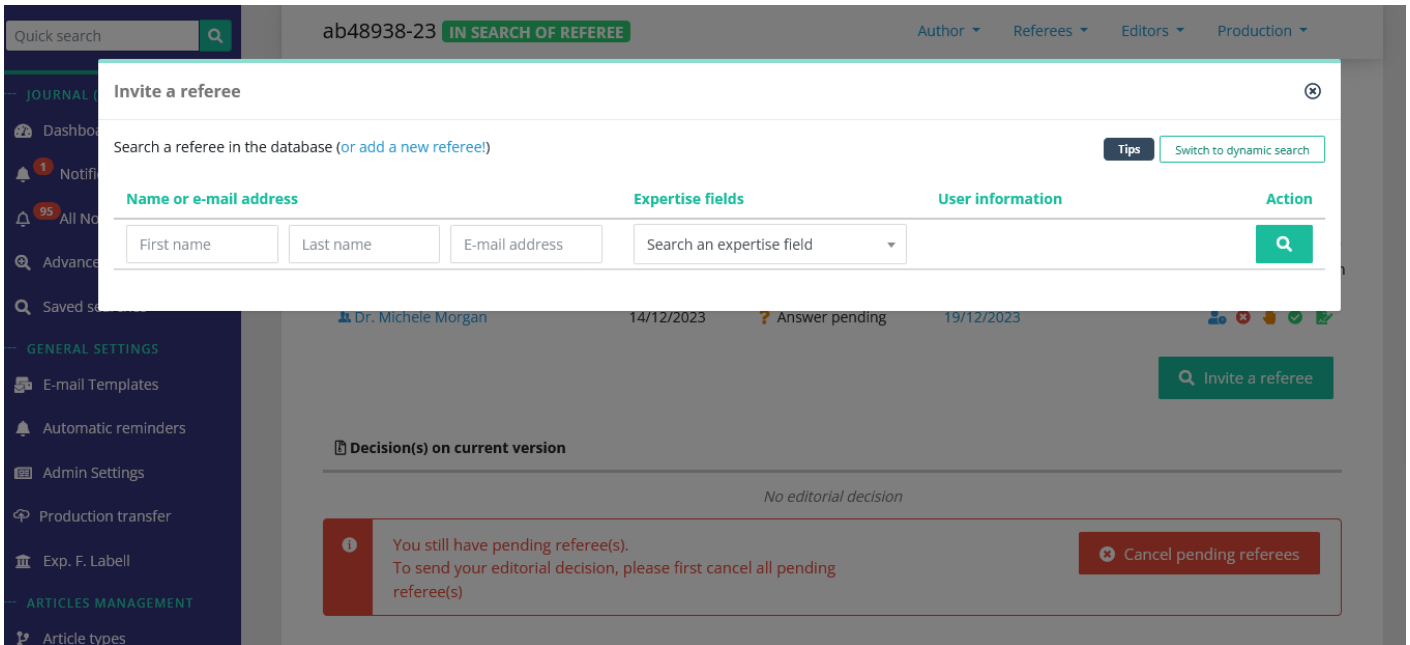

- one concerning the author/co-author status on each article,
- the other concerning editors

These exports are available on any given list of articles. For each user, they include the default institute and contact information. For editors, we also include the assignment and first decision dates, as well as their [responsibility tags](#). This allows for easier tracking of the editorial board activity.

			Export	Columns
Last action date	Author			
28/11/2023	Bersten		Export visible columns	
			Excel	
			CSV	
11/12/2023	Mestre		Export all columns

14/12/2023	Lueber	30/11/2023		
14/12/2023	Beltran	12/12/2023		

Referee invitation

The referee invitation now benefits from a revamped interface and does not redirect to another page. When inviting a referee, the editor now stays on the article page, which is updated automatically when necessary.

Stop the production of an article

On accepted articles, a new action is now available to cancel the production. The "Stop production" will allow you to reopen the peer review. NB To prevent questions related to status history, any proofs and production status stored in Nestor will be deleted.

 NO

 Decision(s) on current version

No editorial decision

 Stop production

 Resend to pro

Stop Production

This will revert the article status and reopen the peer review/revision process. The following actions will be executed:

- delete production statuses in history
- delete any proofs or corrected proofs
- reset production date
- inform the production system

 Do nothing

 Confirm stop production

Revision #4
