

6.60 - Metadata configuration, unfolded articles flag, LaTeX extractions

16 June 2025

Standard, special and [custom fields](#) now all benefit from a unified configuration:

Abstract

Comments

For each metadata field, the label/description is now configurable, as well as joins with editor profiles and submission.

GENERAL SETTINGS

Name (Title)

This should be left blank. If you decide to customise it, keep in mind this this label will be displayed regardless of the language selected by users. If your Nestor support several languages, you should therefore provide a multi-language label, e.g. "Titre en français/French title"

SUBMISSION SETTINGS

Reset on revision

Reserved to eddy

Description for authors

If the field is requested at submission, this text will be displayed in the submission tunnel to explain the purpose of the field to the corresponding author.

This paves the way to [7.00](#), linking questionnaires and metadata fields.

Flags can now be unfolded by default in article pages:

EDIT FLAG

Field name *

Nombre de pages

Value *

Color *

Icon *

Important

If enable, the whole flag will be displayed on article pages (icon + text).
