

7.20 - Duplicate submission warning, relaxed reverts

12 January 2026

Duplicate submission warning

Before creating a new submission, Nestor will check if the author already has a paper ongoing. The idea is to prevent unintended duplicates at revision.

The screenshot displays the Nestor author interface. At the top, the logo for NESTOR ecp sciences is visible on the left, and navigation links for A&A, AUTHOR, and NESTOR ADMIN are on the right. Below the header, there are tabs for 'As author' (4), 'As co-author' (1), and 'As referee' (0). A 'Submit new article' button is located in the top right corner. The main content area is divided into sections: 'To-do list' (2), 'In progress' (0), and 'Finished' (2). A modal window titled 'Confirmation' is overlaid on the interface, displaying the message: 'You have already one or several articles pending/in progress. Do you wish to submit a new article?'. The modal has two buttons: 'Check my pending articles' and 'Submit new article'. A red arrow points from the 'Submit new article' button in the top right to the modal window.

Relaxed reverts

In order to simplify workflow corrections, status reverts are no longer tied to a mail event. Executing a revert will just raise a warning to the editor.

Miscellenaous

- All submissions: autosave of the author questionnaire
 - LaTeX Submissions: authors first and last names are better segmented
 - User search: slight UX improvements
 - Referee creation: optional country/institute
-

Revision #2
